

## INTERNSHIPS & END-OF STUDIES PLACEMENTS

As part of the 5-year integrated Master Program (Grande Ecole Program), students from ESDES are enrolled in a three-year generalist undergraduate program in management, followed by a two-year masters concentration.

Internships are a mandatory requirement of this program. They offer the possibility of putting knowledge into practice in a professional environment and facilitating the transition from higher education to the business world.

### INTERNSHIP CONDITIONS

The internships are full-time, covered by a three-way agreement between ESDES, the student and the company.

- › Before the beginning of the internship, the company completes the internship description form, in liaison with the student. This form includes the description of the mission given to the intern and its conditions.
- › Those elements must be validated twice, by the ESDES administration and its faculty.
- › ESDES submits the internship agreement to the student who has it signed by the company.

### MONITORING

Each student is followed individually by an academic advisor of ESDES, who is available to answer any question that the company might have during the internship. He is responsible for ensuring that the internship takes place under the best conditions, and stays in contact with the student and the internship supervisor. At the end of the mission, the internship is evaluated by the supervisor. The evaluation is then returned to ESDES by the student.

### GOOD TO KNOW!

No student can complete an internship of more than 6 months per academic year in the same organization. (Education Code, art. L. 612-9).

The host organization must observe a waiting period between two internship agreements on the same position, corresponding to one third of the length of the last internship.
